Task 2: System Configuration

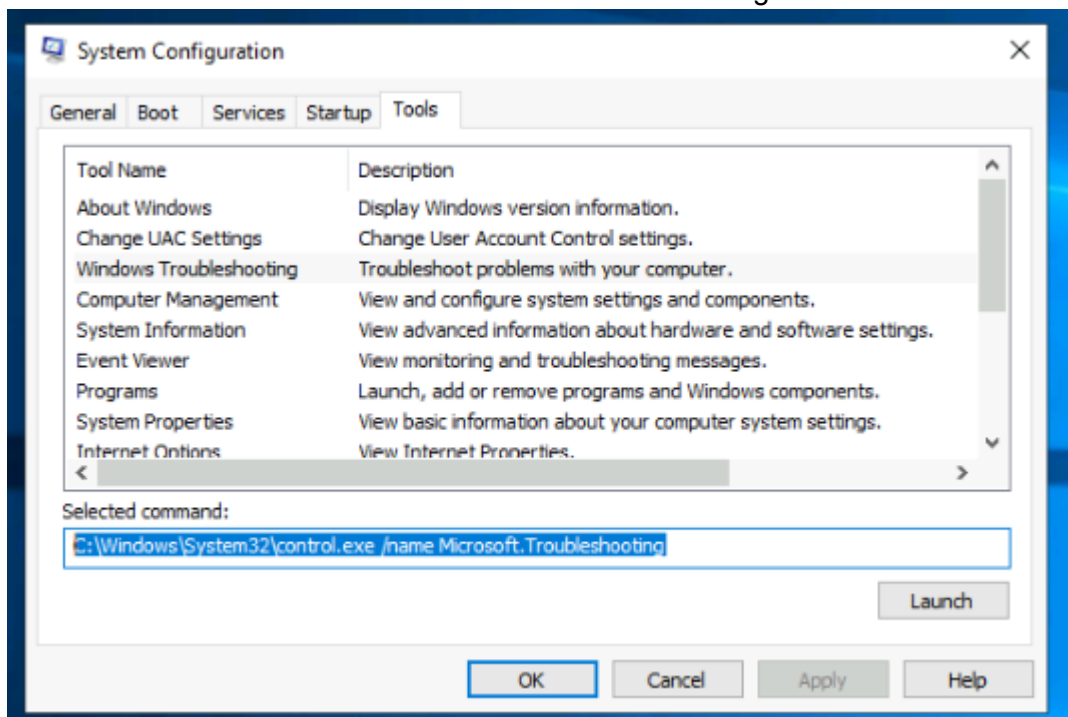

→ What is the name of the service that lists Systems Internals as the manufacturer?

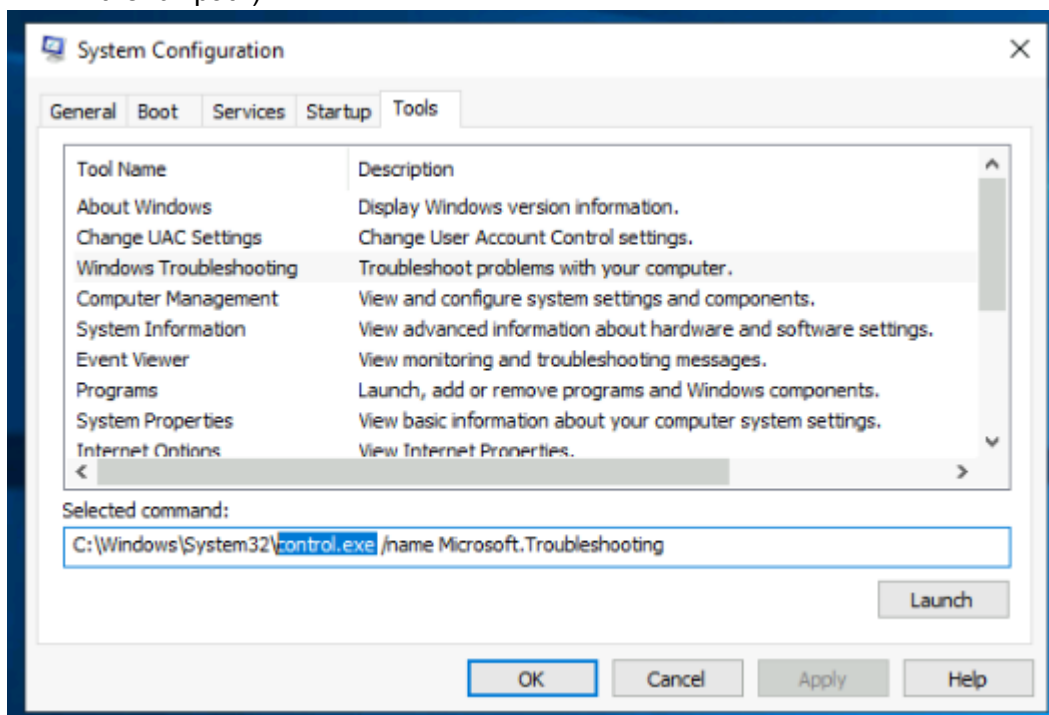

→ Whom is the Windows license registered to?

→ What is the command for Windows Troubleshooting?

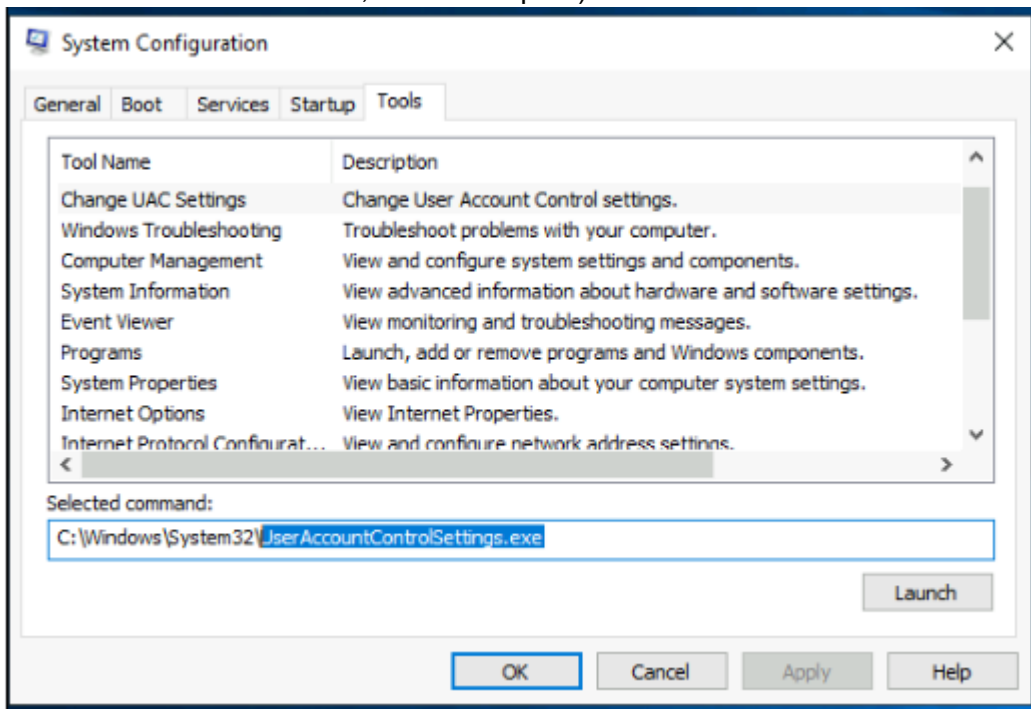

→ What command will open the Control Panel? (The answer is the name of .exe, not the full path)

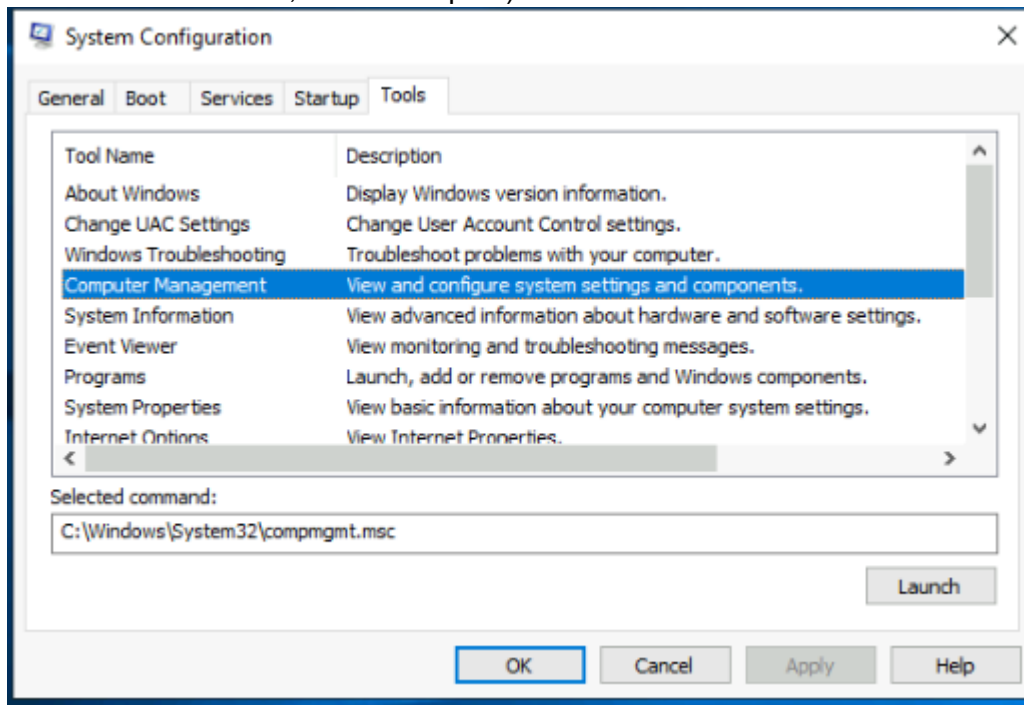

Task 3: Change UAC Settings

- What is the command to open User Account Control Settings? (The answer is the name of the .exe file, not the full path)

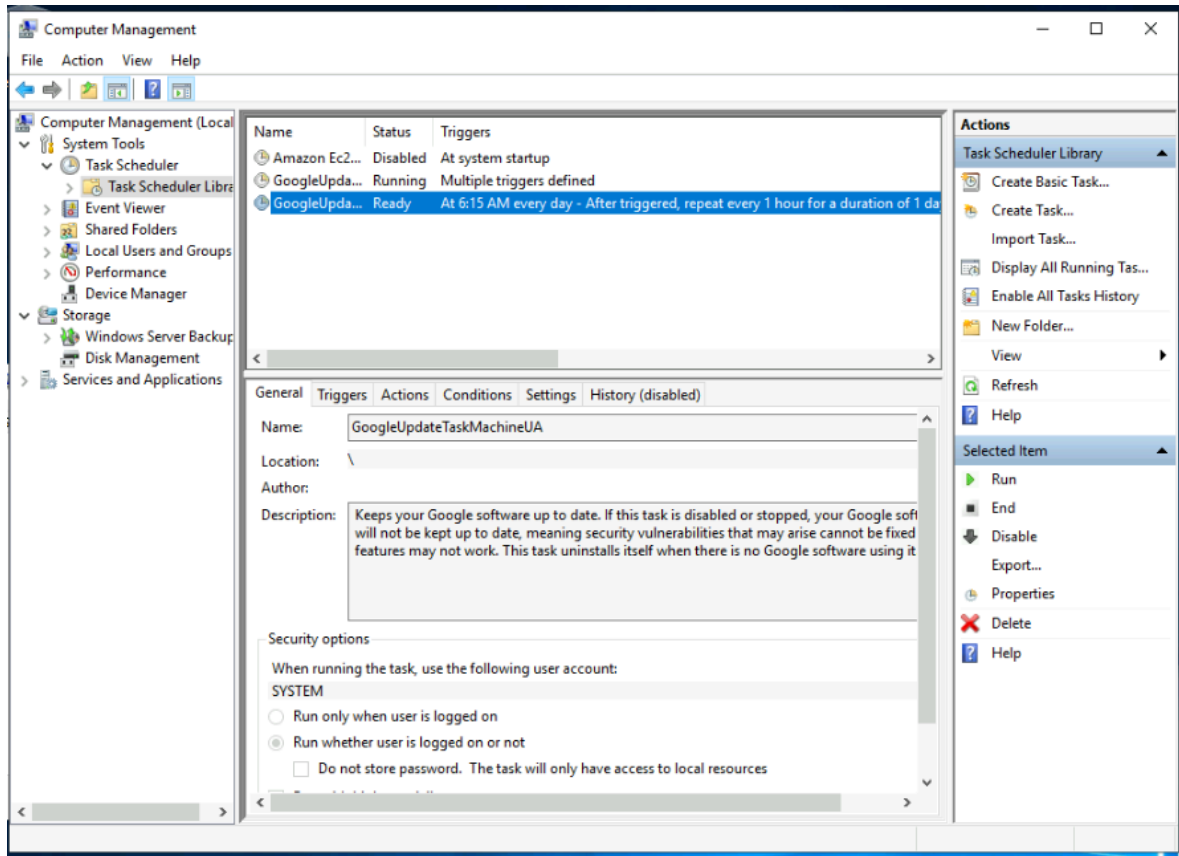

Task 4: Computer Management

→ What is the command to open Computer Management? (The answer is the name of the .msc file, not the full path)

→ At what time every day is the GoogleUpdateTaskMachineUA task configured to run?

→ What is the name of the hidden folder that is shared?

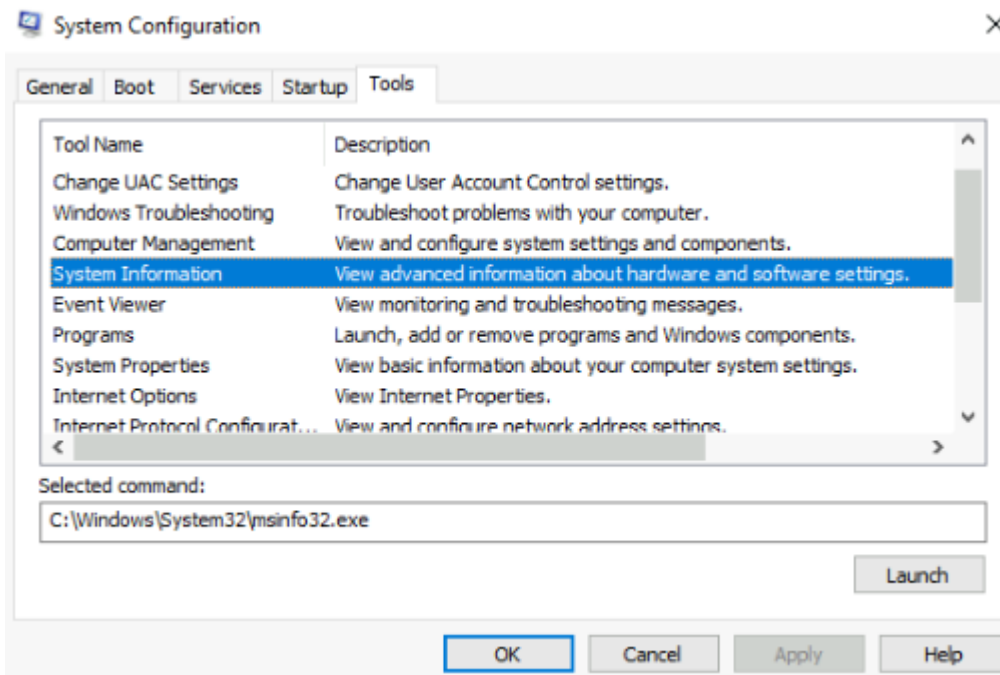

The screenshot shows the Windows 'Computer Management' console. On the left, the 'Shares' folder is expanded under 'System Tools'. The main pane displays a list of shared folders:

Share Name	Folder Path	Type	# Client Connections	Description
ADMIN\$	C:\Windows	Windows	0	Remote Admin
C\$	C:\	Windows	0	Default share
IPC\$		Windows	0	Remote IPC
sh4r3dF0ld3r...	C:\Users\Administ...	Windows	0	

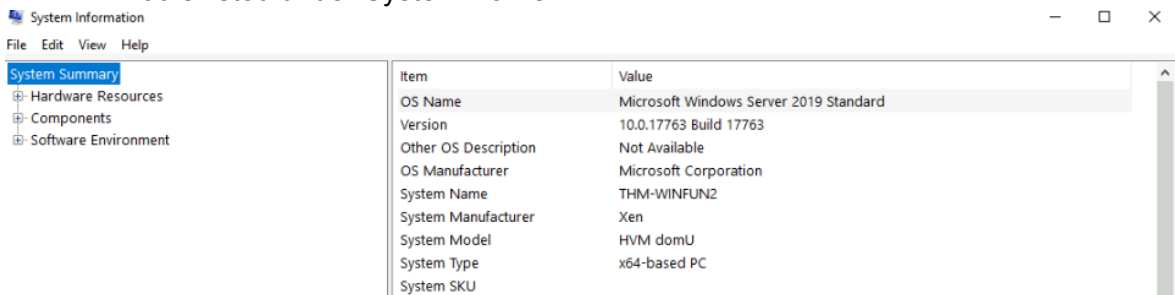

The 'sh4r3dF0ld3r...' folder is selected. A 'Properties' dialog box is open for this folder, with the 'Share' tab active. The 'Share name' field contains 'sh4r3dF0ld3r'. The 'Folder path' is 'C:\Users\Administrator\Desktop\sh4r3dF0ld3r'. The 'User limit' is set to 'Maximum allowed' with a value of 1. The 'Offline Settings...' button is visible at the bottom right of the dialog.

Task 5: System Information

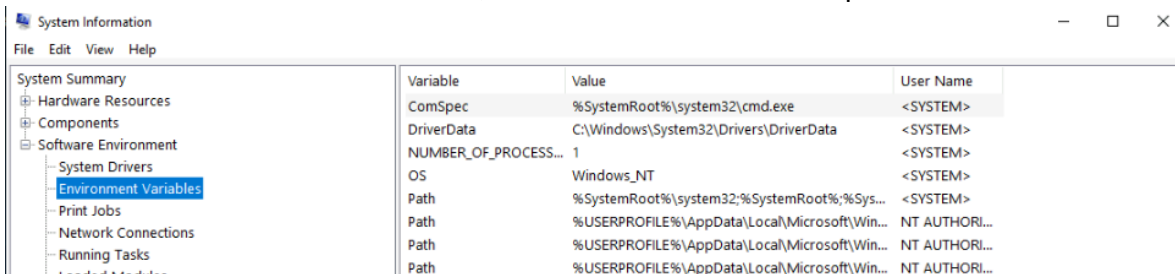

→ What is the command to open System Information? (The answer is the name of the .exe file, not the full path)

→ What is listed under System Name?

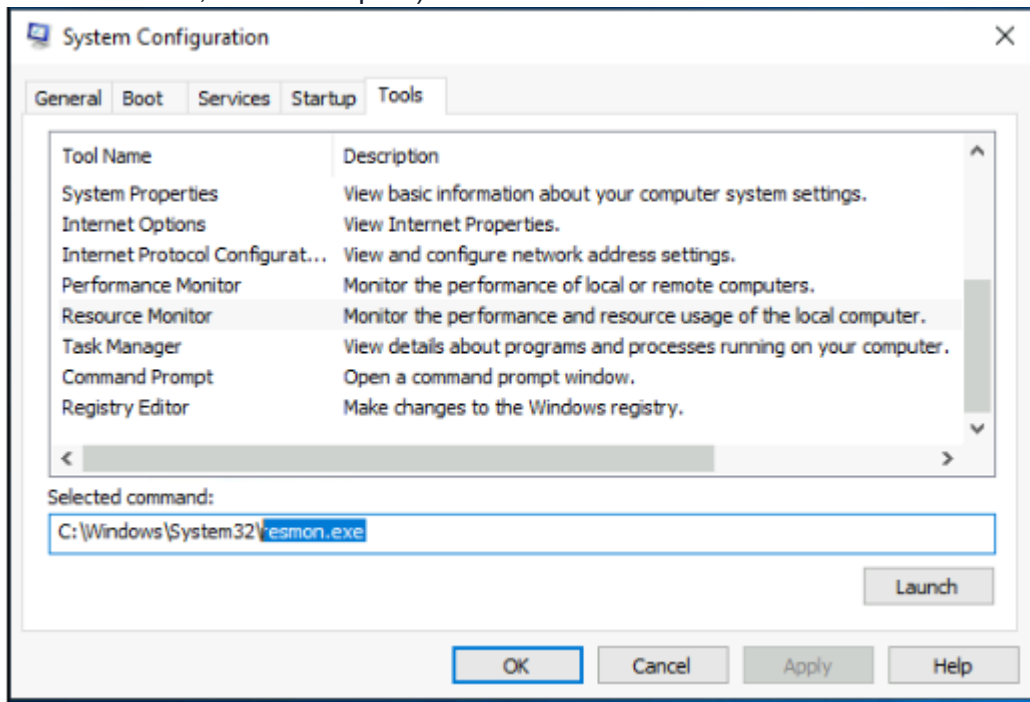

→ Under Environment Variables, what is the value for ComSpec?

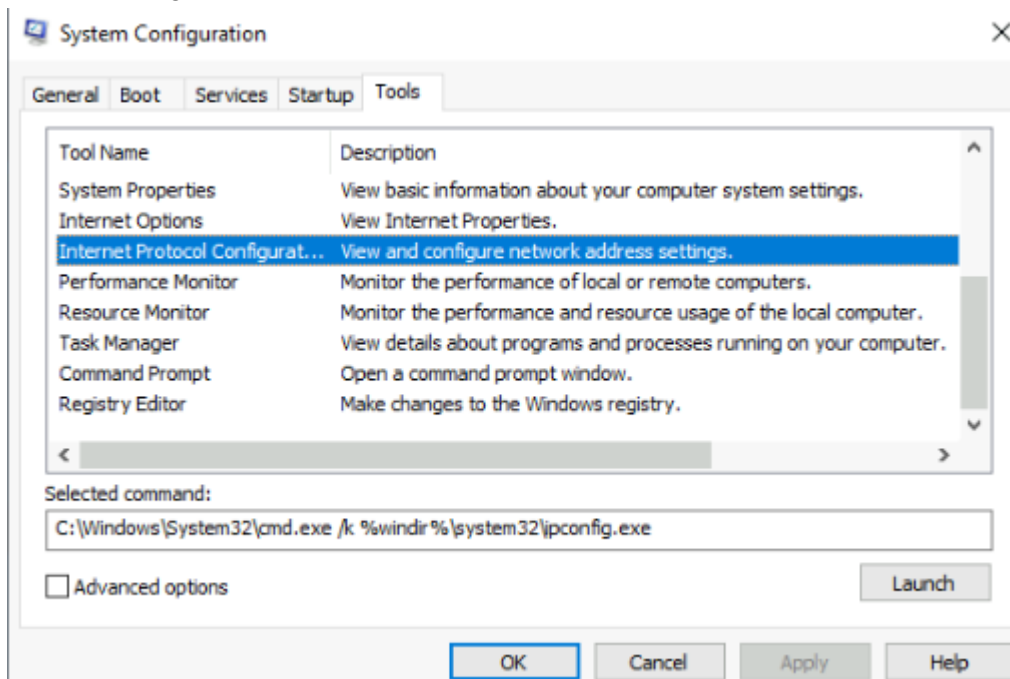

Task 6: Resource Monitor

→ What is the command to open Resource Monitor? (The answer is the name of the .exe file, not the full path)

Task 7: Command Prompt

→ In System Configuration, what is the full command for Internet Protocol Configuration?

→ For the ipconfig command, how do you show detailed information?

```

Reflexión

Una vez completadas las tareas, reflexione sobre los principales desafíos que enfrentó durante la práctica.

1. ¿Qué conceptos le resultaron más difíciles de entender y por qué?

R/ Los aspectos más desafiantes de entender estuvieron relacionados con la configuración de permisos en carpetas, aunque parecías una tarea sencilla, requirió un entendimiento profundo de las opciones avanzadas de seguridad en las propiedades de los directorios especialmente al establecer permisos específicos como solo lectura mientras se bloquean las funciones de escritura y ejecución.

2. ¿Qué aprendió sobre la administración básica de Windows que no sabía antes?

R/ Aprendimos cómo utilizar herramientas administrativas como `lusrmgr.msc`, `services.msc`, y el Event Viewer para gestionar usuarios, servicios y monitorear la seguridad del sistema. No sabíamos que era posible crear usuarios, grupos y establecer permisos tan detallados desde el sistema operativo sin usar software adicional.
